Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kopp.

Kopp teaches all the limitations of the claims except for the mix module being constructed of a polyether ketone reinforced with graphite and PTFE lubricants or KETRON™ PEEK HPV. At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to provide the device of Kopp with the mix module being constructed of a polyether ketone reinforced with graphite and PTFE lubricants or KETRON™ PEEK HPV, because Application has not disclosed that the mix module being constructed of a polyether ketone reinforced with graphite and PTFE lubricants or KETRON™ PEEK HPV provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with either claimed mixer module "s material or the Kopp's mixer module material. Therefore, it would have been an obvious matter of design choice to modify the device of Kopp to obtain the invention as specified in claims 1 and 2.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a spray gun:

Konieczynski et al., and Dingler.
